

**DEPARTMENT OF THE AIR FORCE**  
**AIR EDUCATION AND TRAINING COMMAND (AETC)**

13 Jul 2010

MEMORANDUM FOR ALL DETACHMENT PERSONNEL

FROM: DET 2, 336 TRS/CC

SUBJECT: Commander's Safety Policy

1. Detachment 2, 336th Training Squadron is an integral part of the team defending America. Safety, on and off the job, is an essential element of sharpening and maintaining our combat edge. Safety mishaps may cause serious injuries or death. We strengthen our team by adhering to safety standards and using sound judgment. Supervisors will ensure a safe work environment and heighten safety consciousness. Operational Risk Management is your tool to assess risk and weigh benefits against possible risk. As the Detachment Commander it is my philosophy, to protect the force through rigorous and a proactive safety program.
2. The Air Force has initiated an aggressive set of safety initiatives. As you perform both routine and non routine activities, apply thorough risk management procedures. The detachment commander will be the approval authority for High Risk activities.
3. Everyone has the ultimate responsibility for safe living. Comply with established instructions and technical orders. Protect your fellow Airman by identifying hazardous practices and conditions on the post. Correct hazardous practices and conditions if it is within your power to do so; report them if they are out of your control. Drive vigilantly and follow the rules—play safe, train smart and operate effectively.
4. Safety is an essential element in our mission's success; your personal dedication to and continued support of the highest safety standards promotes safety awareness throughout the Air Force. Lead by example and you will ensure a safe and healthy environment for all of us to train and work under.

*Natasha N. Porcher*
